Sandra:

Sure, I would be glad to help on Columbia River Toxics work - there is a lot going onlet me know.....Dave Croxton is lead for TMDL....he would be the person to talk about the TMDL.

I could do it in person but not on Nov. 13th.

Mary Lou

Subject place based folks in Seattle Nov 13 week - interested in Col. River update

Mary Lou, Rick,

I'm trying to coordinate the place-based visit to Seattle the week of Nov 13, and one of the topics we'd be interested in getting an update on is the work of the Columbia River as a geog. priority, the toxics reduction work, and the possibility of the temp TMDL being resurrected.

Is this something either or both of you are interested in and have time in your schedule for a short conversation? In person would be great, or if it doesn't work for the week we're in Seattle, maybe we can schedule you for one of our Place-based conference calls this fall.
